

BRIEF SUMMARY

Being a committed team member, I want to be part of the renowned organization to contribute to the organization's growth, based on expertise, and to further my capabilities by learning new exposure within the structured framework of the Organization.

In addition to programming languages, I have developed expertise in web development technologies and tools, including Microsoft Office tools, Object-Oriented Programming (OOPS), DBMS & SQL, Spring, .NET, Cloud Computing, and DevOps. I have also obtained certifications in Java Programming from Oracle and C & C++ Programming from Unisoft Technologies. Furthermore, I completed the TruBot 4.0 Designer course by DATAMATICS TurBot, further enhancing my automation skills.

Throughout my academic and professional journey, I have cultivated strong communication skills and a collaborative mindset. I thrive in team environments and value discipline, adaptability, and flexibility. I approach problem-solving with creativity and innovation, and I pride myself on my ability to effectively manage time and organize tasks.

KEY EXPERTISE

Front-End Web Development Software Development Database C CPP Python Java HTML CSS PHP MySQL

EDUCATION

School of Management M.C.A. - Computer Applications CGPA: 7.34 / 10.00	2022 - 2024
G. H. Raisoni College of Engineering and Management BCA - Computer Applications Percentage : 91.46 / 100.00	2020 - 2022
S. S. M. M COLLEGE, PACHORA, Pachora 12 th NASHIK DIVISION BOARD Percentage: 57.38 / 100.00	2019
S. G. S HIGHSCHOOL, PACHORA, Pachora 10 th NASHIK DIVISION BOARD Percentage: 76.00 / 100.00	2017

PROJECTS

E-Commerce website Mentor: Avinash Sir Team Size: 2 Key Skills: WordPress As the order is placed, the customer's web browser will communicate back and forth with the server hosting the e-commerce website. Data pertaining to the order will be relayed to a central computer known as the order manager. It will then be forwarded to databases that manage inventory levels; a merchant system that manages payment information, using applications such as PayPal; and a bank computer. Finally, it will circle back to the order manager. This is to make sure that store inventory and customer funds are sufficient for the order to be processed. After the order is validated, the order manager will notify the store's web server. It will display a message notifying the customer that their order has been successfully processed. The order manager will then send order data to the warehouse or fulfillment department, letting it know the product or service can be dispatched to the customer. At this point tangible or digital products may be shipped to a customer, or access to a service may be granted.	29 Apr, 2023 - 29 May, 2023
cake management system Mentor: Vinod Mahajan Sir Team Size: 1 Key Skills: HTML5 CSS PHP MySQL Bakery Management System is totally computer based software application to maintain day to day transactions in a bakery. This software helps to store all bakery items with category and sub-category. It also maintains record of purchase and sales. It maintains details of Supplier. A bakery management system should be robust enough to handle all the bakery operations efficiently. From handling online orders to managing inventory, the bakery POS should help you take care of everything. Here are some features you should look for in your bakery management system	05 Jan, 2022 - 11 Mar, 2022

ASSESSMENTS / CERTIFICATIONS

Python programming

Key Skills: Basic python Advanced python

Python is a computer programming language often used to build websites and software, automate tasks, and conduct data analysis. Python is a general-purpose language, meaning it can be used to create a variety of different programs and isn't specialized for any specific problems. This versatility, along with its beginner-friendliness, has made it one of the most-used programming languages today

HTML frontend developer

Key Skills: Html5

I have successfully completed the HTML Front End Developer certification course, which provided me with a basic introduction to front-end development and its fundamental concepts. Throughout the course, I had the opportunity to clarify any doubts I had and gained valuable skills and knowledge about being an HTML front-end developer. This course was offered by Great Learning.

C and cpp programing

Key Skills: C-programing Ops All concept Cpp Object detection Memory management

During my undergraduate studies, I enrolled in the C & C++ programming course at Unisoft Technology Nagpur. This course proved to be highly beneficial for me as it equipped me with valuable programming skills. Throughout the course, I gained a comprehensive understanding of C programming concepts, C++ concepts, debugging techniques, object-oriented programming, and memory management. This knowledge has been particularly valuable as C programming serves as a foundational language in programming. I am now proficient in applying programming concepts and logic to develop efficient code.

SEMINARS / TRAININGS / WORKSHOPS

MongoDB Worksop Institute Name: G. H. Raisoni College of Engineering and Management

19 Mar, 2022 - 20 Mar, 2022

Key Skills: MongoDB

During the workshop of Mongoddb I have learn MongoDB is a document database used to build highly available and scalable internet applications. With its flexible schema approach, it's popular with development teams using agile methodologies.
